Quotation for the creation of an Online Reservation Web System for the company:

It is a pleasure to present this proposal for the development of an Online Reservation System that will allow the clients of a small hotel or restaurant to make reservations in real time, and the administrator to manage availability, payments, and automatic notifications.

The goal is to offer a modern, functional, and cost-effective solution that provides a friendly experience for both end users and administrative staff.

Website Design:

- A visual analysis of the company's logo and graphic identity will be carried out to propose improvements or redesigns if necessary. *This may affect the final price.*
- The reservation system will be designed in **Figma**, in its web version, according to the client's specifications.
- If the client does not have a clear idea, personalized design proposals will be presented.
- The design includes:
 - Interactive visual mockup
 - Typography and color palette proposal
 - Presentation to the client before starting development
- The system may offer **multi-language support (Spanish and English)**.
- The base proposal includes up to **5 screens or sections**. Any additional screens will have an extra cost.

Website Development:

- To begin development, the client must provide all the necessary information (texts, images, videos, logos, etc.).
- **Recommended sections for the system:**
 - Header with navigation and logo
 - Main banner with image or video
 - "About Us" section
 - Mission, vision, and values
 - Photo and/or video gallery
 - Reservation section with a functional form
 - Contact section with email integration
 - Social media links and footer
- The reservation form will allow sending emails automatically to the client's email address at no additional cost.
- The website will include smooth animations, modern sans-serif typography, and a professional color combination that reflects the brand identity.
- Good UI/UX practices and responsive design will be applied.

Technologies to be Used:

- **Front-End:** React + Tailwind CSS
- **Back-End:** Node.js + Express.js
- **Database:** MySQL
- **Hosting:** Vercel (Front) + Railway (Back + DB)

Domain y Hosting:

- A domain and hosting will be provided **free of charge for the first year**.
- After the first year, the client will cover the annual cost of the domain and hosting.

- The exact amount will depend on the domain name and hosting capacity required.

Estimated Costs:

- Logo redesign or creation: **\$100 – \$300** (depending on complexity).
- Additional language: **\$75 – \$200** (depending on text volume).
- Additional screen: **\$50 – \$100** (depending on complexity).
- **Base price for the reservation system: ₡400,000**
(Approximately \$750 USD, subject to final requirements)

Important Notes:

- To start the project, the client must make an **initial payment of 50%** of the total agreed amount.
- In case of contract cancellation, the amount to be refunded will depend on the project's progress. If more than 50% of the work has been completed, no refund will be issued.
- The client must sign this quotation as confirmation of acceptance of the terms and conditions.
